

# Avian Medicine and Surgery in Practice: Companion and Aviary Birds, Second Edition

## Table of Contents

### **Clinical Anatomy and Physiology**

Introduction  
The Skin, Feathers, Nails and Beak  
The Skeleton  
The Digestive Tract  
The Urinary System  
The Respiratory Tract  
The Reproductive Tract  
Cardiovascular System  
Nervous System  
Endocrine Glands  
Organs of the Special Senses  
The Immune System  
Further Reading

### **Husbandry, Grooming and Nutrition**

Husbandry  
Further Reading

### **The Physical Examination**

Understanding the Masking Phenomenon  
Examination Room Equipment  
History Taking  
The Distant Examination  
The Physical Examination  
Further Reading

### **Clinical Techniques**

Diagnostic Techniques  
Treatment Techniques  
Further Reading

### **Diagnostic Imaging**

Radiology  
Ultrasound  
Computerised Tomography (CT)  
Fluoroscopy  
Magnetic Resonance Imaging (MRI)  
Further Reading

### **Endoscopy**

Equipment  
Caring for the Equipment  
Operating the Endoscope  
Biopsy Collection

Endoscopic Approaches  
Further Reading

### **Interpreting Diagnostic Tests**

Choosing Which Tests to Use  
Haematology  
Protein Electrophoresis  
Clinical Biochemistry  
Lipids  
Serology  
PCR Testing  
Cultures  
Cytology  
Further Reading

### **Supportive Therapy**

Dehydration  
Hypothermic Shock  
Catabolism  
Respiratory Compromise  
Analgesia  
Blood Loss  
Hospital Care  
Further Reading

### **Differential Diagnoses**

Change in Droppings  
Appetite and Thirst  
Vomiting  
Weight Loss  
Posture  
Feathers and Skin  
Wings  
Feet and Legs  
Beak  
Eyes  
Face  
Body  
Paediatrics  
Further Reading

### **Diseases of the Skin and Feathers**

Congenital Disorders  
Nutritional Disorders  
Endocrine Disorders  
Bacterial Infections  
Fungal Infections  
Viral Infections  
Parasitic Infections  
Neoplastic and Pseudoneoplastic Conditions  
Toxic Conditions

Conditions Affecting the Uropygial Gland

Iatrogenic Trauma

Feather Damaging Behaviour and Other Self-Mutilating Conditions

Further Reading

### **Disorders of the Beak and Cere**

Malformation

Trauma

Hyperextension of the Maxilla

Overgrown Maxilla

Infection

Neoplasia

Keratin Flakes on the Beak

Disorders of the Cere

Further Reading

### **Disorders of the Eye**

Assessing the Eye

Disorders of the Eye

Further Reading

### **Disorders of the Ear**

Otitis Externa

Otitis Media and Otitis Interna

Further Reading

### **Diseases of the Legs, Feet and Toes**

Malformations

Pathological Fractures

Toe Anteroflexion

Slipped Tendon (Perosis)

Swollen Joints

Pododermatitis

Constricted Toe Syndrome

Bilateral Paresis or Paralysis

Unilateral Paresis or Paralysis

Hyperkeratosis

Self-Mutilation of the Feet and Toes

Toe Tapping in Eclectus Parrots

Leg Band Constriction

Toe Necrosis

Frost Bite

Overgrown Nails

Missing Nails and Toes

Further Reading

### **Disorders of the Musculoskeletal System**

Skeletal

Hereditary, Congenital and Developmental

Nutritional/Metabolic

Joints

Muscles  
Congenital  
Non-Inflammatory  
Inflammatory: Non-Infectious  
Inflammatory: Infectious  
Neoplastic  
Tendons and Ligament  
Further Reading

### **Diseases of the Gastrointestinal Tract**

The Oropharynx and Crop  
Proventriculus and Ventriculus  
Disorders of the Intestinal Tract  
Disorders of the Cloaca  
Further Reading

### **Disorders of the Liver**

Overview of Liver Disease  
Aetiology of Liver Disease  
Clinical Signs  
Diagnosis  
Treatment  
Chlamydiosis  
Pacheco's Disease  
Further Reading

### **Disorders of the Pancreas**

Exocrine  
Endocrine  
Further Reading

### **Diseases of the Respiratory System**

Upper Respiratory Tract  
Lower Respiratory Tract  
Further Reading

### **Disorders of the Cardiovascular System**

Cardiac Disease  
Atherosclerosis  
Hypertension  
Further Reading

### **Disorders of the Lymphatic and Haematopoietic Systems**

Overview  
Diseases of the Bone Marrow  
Primary Disorders of the Immune System  
Further Reading

### **Disorders of the Nervous System**

Introduction  
History

Distant Examination  
Physical Examination  
Diagnostic Tests  
Central Nervous System Disorders  
Bacterial Infections  
Fungal Diseases  
Chlamydia  
Protozoal Diseases  
Nematodes  
Trauma  
Cerebrovascular Accidents  
Toxins  
Nutritional Deficiencies  
Neoplasia  
Epilepsy/Seizures  
Peripheral Nervous System Disorders  
Further Reading

### **Disorders of the Reproductive Tract**

The Male Reproductive Tract  
The Female Reproductive Tract  
The Ovary  
The Oviduct  
Investigating Reproduction Problems in the Aviary  
Further Reading

### **Disorders of the Urinary System**

Renal Disease  
Urolithiasis  
Gout  
Zinc Toxicosis  
Further Reading

### **Behavioural Problems**

Introduction  
Principles  
Understanding Bird Behaviour  
How Do Behavioural Problems Develop?  
Historical Approach to Treating Behavioural Problems  
New Concepts  
Basic Steps to Implement in a Behaviour-Modification Programme  
Further Reading

### **Incubation of Eggs**

Why Incubate Eggs?  
When to Collect Eggs  
Storing Eggs Prior to Incubation  
Sanitation of the Eggs  
Equipment  
Incubation Parameters  
Monitoring

Hygiene  
Record Keeping  
Embryonic Development  
Hatching  
Egg Necropsy  
Further Reading

### **Paediatrics**

Introduction  
Examination of the Chick  
Common Problems  
Further Reading

### **Analgesia and Anaesthesia**

Analgesia  
Anaesthesia  
Further Reading

### **Surgery**

Introduction  
Pre-Surgical Assessment and Conditioning  
Surgical Preparation and Patient Support Procedures  
Common Soft Tissue Surgical Procedures  
Orthopaedics  
Further Reading

### **Oncology**

Introduction  
Tumour Classification  
Further Reading

### **Appendix 1: Formulary**

### **Appendix 2: Reference Intervals for Commonly Kept Companion Birds**

### **Appendix 3: Biological Values for Some Common Companion Bird Species**
